

Human Growth and Development Opt-Out Request Form

The Human Growth and Development Curriculum has been in place for many years as an integral part of the Health Education program. With input from students, parents, teachers, administrators, clergy and physicians, we have developed an excellent curriculum that allows your child to participate in age-appropriate, scientifically based, subject matter and classroom activities.

The school district believes that the family plays a critical role in students' growth and development education. The school supports both parent/guardian and child in their effort to develop an understanding of human sexuality and the family.

Parents, who wish to exclude their son/daughter from portions of, or all of the human growth and development unit, must place their request in writing. Please mail this form to your child's teacher or send back to school with your son/daughter, **prior to the start date of the program designated by your child's teacher**. Excluded students may be furnished with an alternative assignment on a health-related issue.

I would like my child _____ to be excluded from the following class session(s) of the human growth and development curriculum:

Parent/Child First and Last Name: _____

Signature: _____

Date _____
