MEMO TO: Mary Pfeiffer, District Administrator  
Board of Education

FROM: Steve Dreger, Asst. District Administrator of Learning & Leadership  
Susan Nennig, Director of Curriculum, Instruction, & Assessment

DATE: April 17, 2014

SUBJECT: Project Lead the Way Digital Electronics

Administration is recommending that the Board of Education support recognizing the high school Project Lead the Way advanced course, Digital Electronics, as an elective math course. Students taking this course would be able to count it as an elective credit in math, or the fourth high school math credit completed. This ambition is supported by administration as well as the department chairs of the Math Department and the Engineering & Technology Department.

Administration will be available to answer questions at the Board of Education meeting on Tuesday, April 22.
