## Design & Construction Updates

**Secure Entry and ADA Improvement Projects**

The second phase of construction related to secure entry and accessibility improvements at the District's elementary schools has begun by breaking ground for the addition at Tullar Elementary in April. Interior renovation work will begin at Coolidge Elementary School, Hoover Elementary School, Roosevelt Elementary School/Alliance Charter, and Washington School of Early Learning once school is out for the summer. A new accessibility ramp will also be constructed at Roosevelt Elementary School.

**New Neenah High School**

The subcommittees have made significant progress as the design phase nears completion at the new high school. Their recent work included a review of interior spaces as they begin to determine furniture and technology needs and discussions about how spaces in the larger areas might be used to the fullest extent possible. The Sustainability Subcommittee continues its study of outdoor classroom opportunities and forest development.

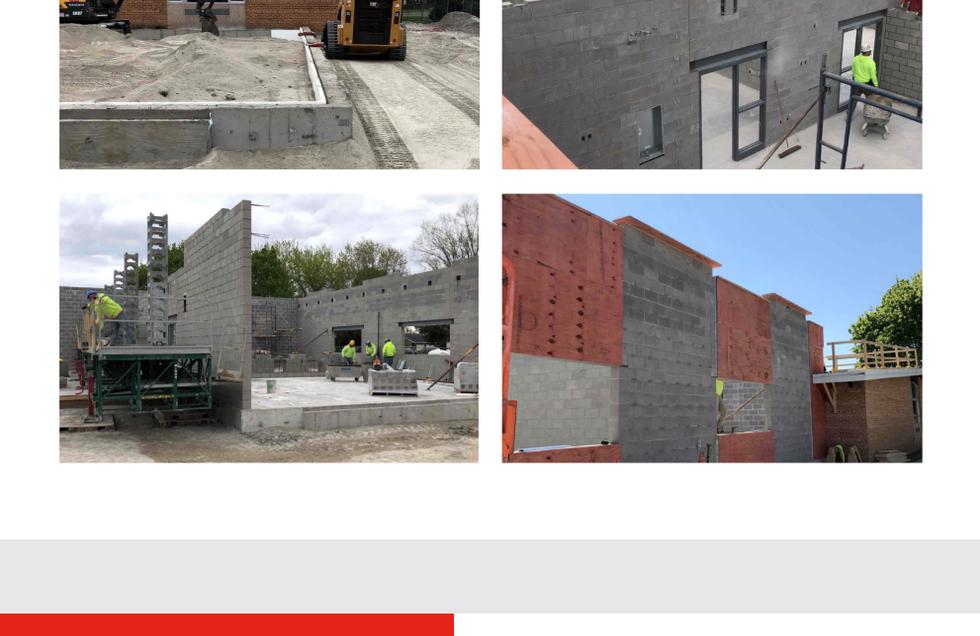

**Current High School Renovations / Intermediate and Middle School Renovations**

The design process has begun related to the renovations of the current Neenah High School. Design for the renovations will be completed by December. Construction is set to begin following the 2021-22 school year.

## Tullar Elementary Construction Updates

In mid-April, Miron began making safety and security and ADA upgrades at Tullar Elementary. Due to the unusual configuration of the school's entrance, the main office will be relocated to an existing classroom space. This required an addition to the west side of the school in order to accommodate additional classrooms and a collaboration area. Concrete foundations and floor slabs have been poured for these new classrooms, interior and exterior masonry walls with plumbing have been erected and electrical and HVAC rough-ins are underway. Work on the new secure entrance will begin when the school year concludes.

**Take a peek at the progress...**

### Next Steps

**What's ahead in 2021?**

- Continue renovations at elementary schools for 2021 ADA/safety upgrades once schools break for summer
- High School
  - Construction starting!
  - Release of next bid packages for concrete, followed by structural steel
  - Final bid package to be issued in November/December
- Intermediate School Renovation
  - Identify needs and programing, and compare/confirm with referendum budget
