

Dear Parents:

Welcome back to another new school year! As you know, head lice continues to be a problem in the state including the Neenah Joint School District area.

The enclosed Fact Sheet has been sent to provide you with information about head lice and how it is spread in order to help control this problem in the school setting. Periodic head checks at home during the school year are encouraged

If your child(ren) has had lice, it is important that you notify the school. Please contact your school nurse for treatment guidelines at 751-\_\_\_\_\_.

Sincerely,
