

Fire Drill

At school we practice for fire drills. Today we will practice for a fire drill. There is not a fire, it is just a practice. That means that we will just pretend that there is a fire.

When the alarm sounds, we need to line up and quietly walk outside. It is important not to touch other students so that we all stay safe. We are just pretending that there is a fire.

Our teacher will count the students to make sure that everyone is safe. Our job is to be quiet and stay still in line. That way we will all be safe.

Once the bell rings, our teacher will tell us that it is ok to return to our classroom. There is not a fire and it is safe to go back into the school. Sometimes it is important to pretend and practice a fire drill so that we can all be safe at school.
